

Maintenance Barricades

Interlocking 42 & 72 Inch High

Bear-i-cade™ light weight panels protect pedestrians from hazardous areas. They are made of rugged, 10 mm thick corrugated polypropylene. The ANSI approved bright yellow color and black graphics are easily seen and "CAUTION" is repeated in Spanish and French. The flat bottom edge keeps tools and hardware from straying out of the work area. The 36" wide panels can be interlocked to form any width or shape. The 42" height, locks and anchors are required by the 2005 Field Employees Safety Handbook. Bear-i-cade locks keep the barricade panels rigid. The U-shaped lock slides easily into the barricade panel corrugations. The Anchor Kit securely attaches to smooth surfaces. Slotted panels are available to accept a sand bag for a holding additional weight.

Features

- Light weight
- Rugged construction
- OSHA colors
- Interlocking panels
- International symbol
- English, Spanish & French
- Meets safety standards
- Corrugated Polypropylene
- 10 mm thick x 36" Wide
- Flat bottom edge
- Easy to clean
- Self-storing Locks
- Anchor Kit available
- Slot for sand bag weight (optional)
- Available in 6 colors

Applications

- Safety Warning
- Maintenance
- Construction Area
- Sound Control
- Electrical Safety
- Screening
- Janitorial Work
- Security
- Elevator Maintenance
- Escalator Maintenance
