

Liberator/ Fortress/ Commander Keypad Speakerphone

The Keypad Speakerphone meets all safety standards by providing the built-in features necessary to promptly connect, and respond to calls for assistance. The keypad also allows the user to place and answer non-emergency calls. Used with the K-Tech ET92 SUREcom, the Keypad Speakerphone serves as an outbound intercom station.

This unique phone is available in surface, flush and panel mount styles. Request a finish to match your décor or have it built right into your fixture panel. Less than 1" deep makes it ideal for use on the lowest-profile surface mount panels.

There's no phone box required and the speakerphone operation means there is no handset to fall off or long cord to contend with.

Industrial quality construction and good looks...right at home wherever you need it.

Liberator—Low Profile Surface Mount

Fortress—Flush Mount
